THE WAR IN THE MORTH

LATEST FROM .ORRIGHTES. The steamer yesterday brought the

Esperanza of Corrientes with dates to T.:ursday 22nd inst. Things at head-quarters are still in

statu-quo, but guerilla firing continues both by day and night. On Tuesday the Marques de Caxias was to proceed to Curuzu to assume command of Port Alegre's army and the fleet: it is thought Port Alegre and Tamandaré will at once resign. General Caceres has again quitted the army, and arrived at Corrientes on the 18th: he intends accompanying Governor Lopez in his visit to Goya and the rural departments.

The Semarario of Asuncion mentions a splendid Album signed by thousands of citizens, in honor of the battle of Curupaity, which was to be presented to Marshal Lopez on Oct. 16th, along with a very fine sash and banner embroidered by the ladies of the capital.

The Paraguayans have put up a board at Curupaity with the inscription "The tomb of the Argentines." On the 25th some Indians of the Chaco were to be baptised with great solemnity at the Reduccion de San

MAILS FROM ROSARIO.

LATEST PROM THE INTERIOR.

The Ferro-Carril of Sunday mentions the arrival of Gen. Paunero at Rosario en route for Mendoza. The 7th bett. is to secompany him, and has been reinforced by 70 men brought down under escort in the Tala from Santa Fé: a waggon load of criminals was also conveyed to the harrack on Saturday and put under arms.

José Alarcon, the murderer of the lamented Mr. Marshall, has been found guilty of homicide, and is sentenced to 10 years penal servitude: this is most unsatisfactory to the English residents, who spent 1,000\$ fts. in getting him caught.

There is no news from Mendoza. Dates from Catamarca, Nov. 9th, contradict the rumor of Maubecin's invading that province. In Riofa the Government set about arresting all the poor fellows not enrolled in the National Guard. Papers from Cordobs assert the Government will now give Mr. Wheelwright the land requisite for the Frayle Muerto station.

LAND-SHARES OF THE MOLE-HEAD

There was a time when the Facchini and Lazzaroni of Italian sea-ports were a greater terror to travellers than the brigands of the Abruzzi.

The same is now true of Buenos Aires, and the scenes of daily occurrence on our Mole-head are no less dolorous than disgraceful. It is needless in this city is aware of this crying farmer. abuse, and the authorities either winkat it or dislike the trouble of devising working, the man driving, with a lever, a remedy.

MOWING MACHINES.

Having heard so much about the new mowing machines now coming so greatly into use, we determined to take a run out to Mr. Coffin's meadows in Moron to see his renowned mowingmachine working, and we willingly admit that, having seen on some English estancias mowing machines thrown on one side as useless, which had been imported by the estancieros at much expense, we were not without our prejudices; but the trial we witnessed on last Saturday evening removed all our doubts previously entertained respecting their adaptability to this country, and convinced us that these new mow ing machines, made expressly according to Mr. Coffin's improved models are, beyond all question, the most useful agricultural invention of the

If time is money in England, verily labor is money in Buenos Ayres; and owing to the high rate of wages paid 'peones' by the day, and the scarcity of hands in this country, we view these new mowing machines as the most necessary and useful implement estancieros and sheepfarmers can have on their premises.

Some ten years ago, when mowing machines were first introduced into the River Plate, there was a decided prejudice against them, owing to the absolute impossibility of keeping them in repair. Mr. Coffin studied the matter, saw their defects, and made a voyage to the States purposely to have an improved machine made which would be adaptable for grass without joints, such as 'alfalfa.' His efforts, we are happy to say, have been crowned with the most signal success. Not only bave we personally inspected and watched the machine mowing down a plot of 'alfalfa' with scientific pr cision and mechanical speed; but some of the principal sheepfarmers and estancieros can testify to their merit, having tried them and proved them; and they all admit, that in the very first mowing they saved in wages alone more than the whole cost of the machine. Formerly, as the estancias were

grass was so abundant in the camp that the sheepfarmers experienced no necessity for growing artificial grasses but of late years this has completely changed, and every farmer in the country, who has the wherewith, sow three or four squares of 'alfalfa,' so as to be independent of the seasons and have his own rick of hay for his horses and fine sheep. One of the chief impediments which the farmers met with was the difficulty to obtain mowers. The cost of fencing in, ploughing and sowing, was a mere trifle in comparison to the heavy expenses of regularly cutting it down. Wages nevertheless frequently part of the crop was lost, owing to the impossibility of getting it cut down in time. Mr. Coffin's mowing machine meets t.e difficulty. The new machine which we saw working mows with ease three 'alfalfa' closer and evener than the best mower, but lays the grass so the farmers, there cannot be the thinly and evenly on the ground, that Landing at Leghorn or Naples you it dries immediately. The greatest trade of the day is in strawberries; whole cargoes keep arriving from Montevideo; steamers that have not even half a dozen of passengers on board start off, for the freight on the strawberries pays all the expenses of the voyage. The strawberry business is quite moderna few years ago, beyond a basket or two to a friend, we received none whatever from Montevideo, but now the staple is established, the trade organized, and bills for ten, twelve and fifteen thousand patacons come up by each mail against strawberry consignments. Who eats all the strawberries landed each morning on the mole-head is the question that puzzles us? for. taking the population of this city at say 170,000, every man, woman and child in Buenos Ayres would have to consume over a dozen every morning to eat them all up. The best, largest and sweetest strawberries that come from Montevideo are now selling at half a patacon per hundred; these are retailed in the market at two and three pesos per dozen. The men who go about the streets with baskets of strawberries make on an average \$100 per day. It is a strange feature that notwithstanding all the care our gardeners and quinteros take with this fruit, they cannot produce such strawberries as the quinteros of Monably the best speculation of the day and also the passenger traffic. would be to ship a cargo of strawberries, well and carefully packed, up to pleasant day for passengers leaving the army-we have no doubt it would by the packet, for although there was pay splendidly. There were many who argued that the suspension of specie payments last June, although nominally for 6 months, would last until the termination of the war. We are glad, however, to see that Governor Flores has proved the strict honor and integrity of his Government, and at the first moment possible rescinded the suspension decree. > It is, therefore, little better than a farce to be calling Municipal elections until first some funds or revenue be supplied. All the taxes collected go to the support of the hospitals; and we have it from a member of the late Board, who carefully inspected the accounts, that the enormous expenses attending the support of these hospitals is every day augmenting. At a rough estimate the Municipal revenue we say yields fifteen millions a year, out of which over ten millions goes to the hospitals—the balance is hardly sufficient to keep 30 blocks in repair all the year round. Since, therefore, the Municipality has no funds, we suggest that henceforward all Municipal improvements be given out on contract to responsible parties or private companies, giving them the right to collect a small tax for same.

YEAUDS IN THE CUSTOM-HOUSE. Revenue department, B. Ayres,

Nov. 22nd, 1866.

To H. E. Dr. Lucas Gonzales Minister of Finance.

On the 15th inst. the Sectional Judge advised me, as in note annexed, that he had issued a warrant for the arrest of Tomas Huergo, officer of the Resguardo, and Francisco Lopez, substitute guard, as implicated in the case of forgery and embezzlement discovered in the Custom-house as I advised you under same date. The Inspector of Resguardo has failed in his efforts to arrest the delinquents, and informs me to-day that Huergo has been absent from his post since the 17th inst: all endeavours to trace his whereabouts have proved fruitless, and it is only known that he abandoned his house on the 18th, and his family do not know what has become of him. On the evening of the 17th he left a letter marked 'confidencial' with the guard, Lopez, requesting him to deliver it next day; and herein he states that he absents himself for the benefit of his health, although it is known that he was not unwell.

Under these circumstances I beg Her captain and crew are in close con-stock. von will declare the post vacant, and finement and treated as 'prisoners of order the return of these documents in order to be laid before the sectional Judge.
