Within the last three years 140,000 all of whom have increased the demand for land and money, the two great necessaries for a young country. Latest Telegrams The cost of raising 140,000 adults, at a low estimate of 200\$ fts. per head, represents 28 million \$ fts. and hence this country has clearly gained that sum in the last 3 years by this addition to its producing power. Moreover each immigrant is found to bring in money or effects fully 60\$ fts.; which shews a further gain of 814 million fuertes in the same period. So that, if even you suppose there is a real the 22nd Oct., and his physicians say balance of trade against us every year there is little hope for him. the market value of the new arrivals more than compensates for it. Meantime the money market is tightened by the additional number of persons requiring it: the daily wants of our citizens alone absorb 500 millions currency (say 4 millions sterling) which can never go back to the bank, because indispensable. It is observed that the Bank has never less than 600 millions in circulation.

A more general system of Banks, as in the United States, is, as Mr. Varela thinks, imperatively called for, especially in our small towns, which at presont absorb so much money of the Provincial Bank. Let the neighbors of Rojas, Azul, Pergamino, Bahia Blanca &c. be empowered to start small Banks of emission, depositing as guarantee the amount in Government Bonds or Cedulas. At the same time let the Provincial Bank take four millions uertes out of the Oficina de Cambios, and substitute Cedulas, thus increasing the present circulation by 100 millions ing been accused ot smuggling arms currency. Let us, though born under other skies, and taught to speak another tongue, share in your pride, and share your faith in a glorious future of the Argentine nation, one of the youngest nations of the earth, and the most thinly populated of all civilized lands; more than this, one which has suffered as few others have done from fearful tyranny over minds and bodies - with every traditional influence adverse, and its sparse popu lation arrayed for half a century in ceaseless civil wars, waged for no principle, but incited solely by love of power or of booty; with the woeful inheritances of contending factions on the one hand, and local jealousies on the other, the Argentine nation has striven to burst the bonds of despotism and ignorance, and in its legislaed, including stations &c as in the tion is climbing the upward path toward enlightenment and progress, with an earnestness unsurpassed by any nation of the globe. No government could attain this without legislative support; no legislature could attain it without the vigorous aid of go vernors. Don't forget that the Printers' benefit comes off to night at the Rafetto Circus, corner of Corrientes and Paraná. The programme is everything that could be desired, and we expect to see the numerous families and friends of the Typographical Guild assemble in strength to aid the funds of this most useful and important society.

The Heat was an engrossing topic of conversation yesterday morning. The thermometer was at 87 Fahrt at breakfast time, and brokers had a perspiring morning of it. Orders, they say, were plenty, but money as scarce as ever. Heat cannot make the money market expand.

We learn that Mr. Charles Walberg, the gallant Swede whose victorious struggle with forty navvies we reported. yesterday, was at one time a Captain in the Swedish Artillery. He is a tall, powerful man. He was twice rewarded with medals at home for gallantly rescuing drowning persons.

People continue to go mad and get locked up in the usual alarming proportion, which, unhappily, is rather on the increase than decrease. A funny case occurred yesterday at the Police office, when a 'sujeto' named Gonzalez called on Mr. O'Gorman and sent in his card. Our distinguished countryman being absent at the moment, the Commissary on duty came out. The visitor bowed with the grace of a Chesterfield and then proceeded to inform the Commissary, in a perfectly rational voice and manner, that he (the visitor) had sound reasons for believing himself to be a man, but had equally valid come a woman, and it 'el Sr. Comisario, would do him the favour to effect the transformation he (the man) would be eternally indebted to him. Bristol's sarsaparilla

Is prepared in the most scientific manner, by thoroughly educated chemists and Druggists, who have had many years' experience. It is not a simple extracts from one article, but is compound, ed of extracts from a number of Roots, Herbs Barks, and Leaves, all of which are possessed of some particular virtue or power in curing the diseases that have their sourse in the blood and bumors; these different vegetable extracts are combined in such a way as to retain, in spill strength, the special curative virtue possessed by each. The goot of the Sarsaparilla plants found in Honduras, is that which we use in this proparation; it is the kind which all medical man esteem moss. About fifty per cent. of Bristol's Sarsaparilla consists of the concentrated extract, the remainder, as above stated being composed of extracts from other powerful, cleaneing and healing vehetable substances. It does not contain any thing that is dagerous or injurious to health, and in this, as in nearly every other respect, is entirely different from all other preparations sold under the name of Sarsaparilla.

By having our own agents at he places where Is prepared in the most scientific manner, by

By having our own agents at he places where the various roots, drugs, herbs and plants, com-posing our medicines, are produced, we are en-abled to evercise that constant care in selection which insures uninformity of excellene, and we spare no money and no effort to procure the best—and only the best—of every article entering into their composition; and it is with the most biding confidence we say, to be sick of all nations and all countries, that, in Bristol's Sarsaparilla you have a remedy more roliable than any before offered to you, and which will no diappoint grou in the cure of.
